Canada 

Message from CEO
Halifax Port Authority – Overview 2017

The Port of Halifax is a national strategic asset that contributes to transportation, trade and the economic and social benefits for our community, region and country.

It was a record-breaking year for containerized cargo volume through the Port of Halifax at 559,242 twenty-foot equivalent units. The Port continues to increase volumes, efficiency and maintain our global connectivity as Canada's Atlantic Ultra Class Gateway.

Diversification and innovation across all lines of port business; including cargo, cruise and real estate has helped the Halifax Port Authority to maintain a solid financial position, as evidenced by a credit rating of A+ from Standard & Pools.

The Port of Halifax works with many partners and stakeholders to grow the Canadian economy, attract new business, create jobs, increase trade and innovate our global supply chain.

Sincerely,

Karen Oldfield

**To the Honourable Marc Garneau
Minister of Transport**

We have audited the accompanying consolidated financial statements of Halifax Port Authority, which comprise the statement of financial position as at December 31, 2017, and the statements of earnings, comprehensive income, changes in equity of Canada and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Authority's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Halifax Port Authority as at December 31, 2017, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

1. Nature of operations

The Halifax Port Authority (the "Authority") was established effective March 1, 1999 pursuant to the Canada Marine Act and is a continuation of the former Halifax Port Corporation. The address of its registered office is 1215 Marginal Road, Halifax, Nova Scotia, B3J 2P6, Canada.

The Authority is managed by a Board of Directors consisting of not more than seven members. The Authority operates on a commercial basis and is mandated to be financially self-sufficient. The Authority exercises management authority over Halifax harbour and Federal real property under its control and has ownership of other property and equipment as outlined in Note 7 to the consolidated financial statements.

2. Summary of significant accounting policies

Statement of compliance

The consolidated financial statements (the "financial statements") have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

The financial statements were authorized for issue by the Board of Directors on March **, 2018.

Basis of presentation

The financial statements are presented in Canadian dollars, rounded to the nearest thousand and are presented on the historical cost basis, except for certain financial instruments measured at fair value. The financial statements are presented in accordance with International Accounting Standards ("IAS") 1 *"Presentation of Financial Statements"*.

Basis of consolidation

The financial statements reflect the consolidated financial position of the Authority and its wholly-owned subsidiary, POSH Management Inc. as at December 31, 2017, and consolidated results of operations for the period then ended. All intercompany transactions, balances, income and expenses have been eliminated in preparing the consolidated financial statements.

Through an operating agreement entered into between Nova Scotia Business Inc. ("NSBI") and the Authority, the subsidiary is responsible to manage the marine facility at Sheet Harbour on behalf of NSBI. Port revenues, less fees charged on gross revenues, and related expenses for the operation of the Port accrue to the subsidiary.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, balances with banks and short term investments with maturities of three months or less. Bank borrowings are considered to be financing activities.

Receivables

Trade receivables and accruals are amounts due from customers in the ordinary course of business where collection is expected in one year or less. Trade receivables and accruals are classified as current assets. Long term receivables include interest and non-interest bearing amounts that are repayable over the terms specified in contractual agreements entered into with third parties. Amounts due within the next twelve months are classified as current assets.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

2. Summary of significant accounting policies (continued)

Receivables (continued)

Trade receivables and accruals, including long term receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method less allowances for impairment. Interest income recognized during the period is recorded as finance income on the statement of earnings. The Authority establishes an allowance for accounts receivable where collection is considered doubtful as required under the Authority's credit and collection policies. Allowances for doubtful receivables are recorded as a reduction to earnings in the period the allowance is identified. Accounts that have been previously allowed for, and for which ultimate collection is considered not likely, are written off.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable, and is recognized when the amount of revenue can be reasonably measured, collection is probable, and when it is likely that the economic benefits associated with the transaction will flow to the Authority for each of the various revenue streams. Amounts recognized and classified as port revenue arising in the course of ordinary activities of the Authority include the following items:

a) *Leases*

Lease revenue is recognized on a straight-line basis over the term of the initial lease agreement. The unearned portion of lease revenue collected during the period is classified as deferred revenue. Deferred revenue that will be earned and recognized within the next twelve months is classified as current at year end. Recoverable costs are presented on a net basis with the associated expenses in the statement of earnings.

b) *Vessels, cargo and passengers*

Revenue earned from vessels, cargo and passengers is recognized when services are substantially rendered. Recoverable costs are presented on a net basis with the associated expenses in the statement of earnings.

Included in port revenue is receipt of landfill material from third parties recognized as revenue upon receipt and the Authority completing the terms under contract.

Other income includes items that are non-recurring and not directly related to the Authority's operations and activities in the course of ordinary activities. Finance income and expenses includes interest on loans, investment income, and interest expense on borrowings not capitalized.

Property and equipment

Federal real property consists of land, dredging, berthing structures, buildings, tenant improvements, utilities, roads and surfaces, machinery and equipment, and projects under construction. Federal real property is carried at historical cost less depreciation and any impairment losses. Federal real property is owned by the federal government and is managed and operated by the Authority as an agent of Her Majesty in right of Canada for certain activities set out in the Canada Marine Act. Federal land, excluding buildings and structures, cannot be mortgaged or pledged as security by the Authority. The Authority is responsible for performing necessary maintenance, restoration and replacement of Federal real property that it manages.

Other property and equipment of the Authority consists of land, buildings, tenant improvements, utilities, roads and surfaces, machinery and equipment, office furniture and equipment, and projects under construction. Other property and equipment are carried at historical cost less depreciation and any impairment losses.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

2. Summary of significant accounting policies (continued)

Property and equipment (continued)

Historical cost of Federal real property and other property and equipment includes expenditures that are directly attributable to the acquisition or construction, including borrowing costs relating to the acquisition or construction. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Authority and the cost of the item can be measured reliably. Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that it is necessary to complete and prepare the asset for its intended use. A qualifying asset is defined as such where it takes the Authority at least six months to complete. Other borrowing costs are expensed in the period in which they are incurred and reported as finance costs in the statement of earnings. The amount of interest capitalized to property and equipment during the year was \$28 (2016 - \$nil).

The carrying amount of replaced capital assets are derecognized as incurred. All repairs and maintenance are charged to earnings during the period in which they are incurred.

Land and dredging are not depreciated. Depreciation on other assets is calculated on the straight-line basis, commencing when the asset is available for use, using rates based on the estimated useful lives of the assets. Depreciation for tenant improvements is based on the terms of the related lease agreements. No depreciation is recorded in the year of disposition. Depreciation rates based on the estimated useful lives of the assets are as follows:

<u>Asset</u>	<u>Rate</u>
<i>Federal real property</i>	
Berthing structures	1.3 - 10%
Buildings	2.5 - 10%
Utilities	2.0 - 10%
Roads and surfaces	2.5 - 20%
Machinery and equipment	5 - 100%
<i>Other property and equipment</i>	
Building	2.5 - 10%
Utilities	2.0 - 10%
Roads and surfaces	2.5 - 20%
Machinery and equipment	5 - 100%
Office furniture and equipment	20 - 100%

Residual values and useful lives are reviewed, and adjusted if necessary, at the end of each reporting period. Gains or losses arising on the disposal of other property and equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets, and are recognized in earnings within other income and expenses.

Infrastructure grants

Grants are recognized at their fair value when it is reasonably assured that the grant will be received and the Authority will comply with all attached conditions. Infrastructure grants relating to property and equipment are deducted from the cost therein and depreciation recorded on a net basis.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

2. Summary of significant accounting policies (continued)

Impairment of long-lived non-financial assets

Long-lived non-financial assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. The recoverable amount is the higher of fair value less costs of disposal and value-in-use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows, or cash generating units ("CGU's"). Where the asset does not generate cash flows that are independent from other assets, the Authority estimates the recoverable amount of the CGU to which the asset belongs. When the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount is reduced to the recoverable amount and an impairment loss is recognized. Impairment losses are recognized as an expense immediately in earnings. An impairment charge is reversed if the asset (or CGU's) recoverable amount exceeds its carrying amount.

Foreign currency

Assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the foreign currency exchange rate in effect at each reporting date. Exchange gains or losses arising from the translation of these balances denominated in foreign currencies are recognized in profit for the period. Revenues and expenses denominated in foreign currencies are translated into Canadian dollars at the average foreign currency exchange rate for the period.

Leases

A lease is an agreement whereby the Authority, the lessor, conveys to the tenant, the lessee, in return for a payment, or series of payments, for the right to use an asset, generally land and buildings, for an agreed period of time. Leases in which a significant portion of the risks and rewards of ownership are retained by the Authority are classified as operating leases. Operating lease rentals are recognized on a straight-line basis over the period of the lease. Leases are classified as finance leases if the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. As at December 31, 2017, the Authority did not have any finance lease agreements.

Initial direct costs incurred in negotiating a lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the term of the lease.

Payments in lieu of taxes

Payments are estimated by the Authority in accordance with the Payments in Lieu of Taxes Act. Accruals are re-evaluated each year and charges, if any, are made in the current period's financial statements based on the best available information.

Provisions

Provisions are recognized when the Authority has a present obligation, legal or constructive, as a result of a past event, and it is probable that the Authority will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using cash flows estimated to settle the present obligation for a period ending beyond one year, its carrying amount is the present value of those cash flows, where the time value of money is material. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. Provisions reflect the Authority's best estimate at the reporting date. Provisions are not recognized for future operating losses.

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Authority has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

2. Summary of significant accounting policies (continued)

Financial instruments

Financial assets and liabilities are recognized when the Authority becomes party to the contractual provisions of the financial instrument. Financial assets are derecognized when control over the contractual rights to receive cash flows and benefits related from the financial asset are transferred and/or substantially all the risks and rewards of ownership have been given to another party. Financial liabilities are derecognized when obligations under the contract expire and are discharged or cancelled. Management of the Authority classifies financial instruments into various categories as disclosed in Note 9 to the financial statements.

Hedges

The Authority enters into derivative financial instruments (interest rate swaps) to manage its exposure on variable interest rates associated with long term credit facilities.

Derivatives are initially recognized at fair value on the date the derivative contracts are entered into and are subsequently remeasured at fair value at the end of each reporting period. The resulting gain or loss is recognized in earnings immediately unless the derivative is designated and is effective as a hedging instrument, in which event the timing of the recognition in earnings depends on the nature of the hedge relationship. The Authority's interest rate swaps are designated as cash flow hedges.

For cash flow hedges, the effective portion of the change in fair value of the hedging item is recorded in other comprehensive income. To the extent the change in fair value of the derivative is not completely offset by the change in fair value of the hedged item, the ineffective portion of the hedging relationship is recorded immediately in earnings. Amounts accumulated in other comprehensive income are reclassified to earnings when the hedged item is recognized in earnings. When a hedging instrument in a cash flow hedge expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss in accumulated other comprehensive income relating to the hedge is carried forward until the hedged item is recognized in earnings. When the hedged item ceases to exist as a result of its expiry or sale, or if an anticipated transaction is no longer expected to occur, the cumulative gain or loss in accumulated other comprehensive income is immediately reclassified to earnings.

Financial derivatives assigned as part of a cash flow hedging relationship are classified as either other long term assets or other long term liabilities as required based on their fair value determination. Hedge accounting treatment results in interest expense on the related debt being reflected at hedged rates rather than variable interest rates.

Employee benefits

The Authority accrues in its accounts, annually, the estimated liabilities for pensions and other employee benefits, including lump sum severance entitlements (or retiring allowances) and self-insured workers' compensation benefits, payable to employees in subsequent years under collective agreements, or in accordance with the Authority's policies.

Pension benefits

The Authority provides post-employment benefits through defined benefit plans and defined contribution plans.

The cost of pension benefits for defined contribution pension plans are expensed at the time active employees are compensated.

The defined benefit plans sponsored by the Authority determine the amount of pension benefits employees will receive on retirement by reference to length of service and salary levels. Obligations associated with defined benefit plans reside with the Authority, even if plan assets for funding the plan are set aside.

The liability recognized in the statement of financial position for defined benefit plans is the present value of the defined benefit obligation at the end of the reporting date, less the fair value of plan assets, together with adjustments for unrecognized past-service costs.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

2. Summary of significant accounting policies (continued)

Employee benefits (continued)

Pension benefits (continued)

Management estimates the defined benefit obligation annually with assistance from an independent actuary using the projected unit credit method. The defined benefit obligation uses estimates for inflation, medical cost trends, mortality, and anticipated salary levels. The discount factor used to present value estimated future cash flows is determined with reference to high quality corporate bonds denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged to other comprehensive income in the period in which they arise. Past service costs are recognized immediately into earnings, unless the changes in the pension are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past service costs are amortized on a straight-line basis over the vesting period.

Interest expenses related to pension obligations and returns on plan assets are included in salary and benefits on the statement of earnings.

Other long term employee benefits

Other long term employee benefits include lump-sum severance entitlements (or retiring allowances) available to employees upon retirement with the Authority, as well as self-insured obligations related to providing workers' compensation benefits.

Lump-sum severance entitlements are recognized on a consistent manner as the Authority's defined benefit plans noted above, however are not actuarially determined. Self-insured workers' compensation and other benefits are recognized when the event triggering the obligation occurs since the level of benefits provided does not vary with years of service, and are determined by management with assistance from an independent actuary. The liability recognized in the statement of financial position for other long term employee benefits is the present value of the defined benefit obligation at the end of the reporting period. Other long term employee benefits are unfunded. Actuarial gains and losses, and past service costs, are recognized immediately into earnings.

Use of estimates and critical accounting judgments

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting year. The Authority's significant estimates and judgements are continually evaluated and are based on historical experience, knowledge of current events and conditions, and other factors that are believed to be reasonable under the circumstances, including expectations of future events. The resulting accounting estimates will, by definition, seldom equal the related actual results, and actual results may ultimately differ from these estimates.

Significant estimates and assumptions that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities include estimates of useful lives for amortization of property and equipment, measurement of pension and employee benefits, estimates of provisions that are uncertain in measurements and timing of settlement, evaluation of financial and non-financial assets for impairments, and fair value measurement of financial instruments. The significant estimates and judgments made by management in recognizing and de-recognizing assets and liabilities, as well as their measurement, are explained in the various accounting policy notes.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

3. Future accounting standards

Financial instruments

The IASB issued the final version of IFRS 9, "Financial Instruments", which replaces IAS 39, "Financial Instruments: Recognition and Measurement". IFRS 9 provides guidance on the classification and measurement of financial assets and financial liabilities, establishes an expected credit losses impairment model and a new hedge accounting model with corresponding risk management activity disclosures. The standard is effective for annual periods beginning on or after January 1, 2018. The Authority has assessed the impact of the new standard, and concluded it will not be material to the financial statements.

Revenues

The IASB issued IFRS 15, "Revenue from Contracts with Customers". IFRS 15 replaces IAS 18, "Revenue", IAS 11, "Construction Contracts", and some revenue related interpretations. IFRS 15 establishes a new control-based revenue recognition model and provides a comprehensive framework for recognition, measurement and disclosure of revenue from contracts with customers, excluding contracts within the scope of the standards on leases, insurance contracts and financial instruments. The new standard becomes effective January 1, 2018, with early adoption permitted. The Authority is currently assessing the impact of the new standard, including reviewing its contracts with third parties.

Leases

The IASB issued IFRS 16, "Leases", which replaces IAS 17, "Leases". IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases. From the perspective of the lessee, all leases under the standard result in a right to use asset at inception of the lease, with related financing over the term of lease. The standard establishes a single lessee accounting model, while maintaining the classification of either an operating or financing lease for the lessor similar to IAS 17. The standard is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted. The Authority is currently assessing the impact of the new standard, however, as a lessor, it is not expected that the new standard will have a material impact to the financial statements.

Accounting standards adopted during fiscal 2017

Statement of cash flows

The IASB amended IAS 7, "Statement of Cash Flows". The amendment was designed to improve the quality of information provided to users of financial statements about changes in an entity's debt and related cash flows (and non-cash changes). The standard became effective during fiscal 2017 and did not have a significant impact on the Authority's financial statements.

4. Other operating and administration expenses	<u>2017</u>	<u>2016</u>
Security and other services	\$ 3,950	\$ 3,509
Payments in lieu of taxes	1,372	1,991

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

5. Gross revenue charge

In order to maintain its Letters Patent in good standing, the Authority is required to annually pay to the Minister of Transport a charge on gross revenues which is calculated as follows:

<u>Gross revenue</u>	<u>Charge</u>
up to \$10,000	2%
on the next \$10,000	4%
on the next \$40,000	6%
on the next \$10,000	4%
over \$70,000	2%

6. Loans and receivables

	<u>2017</u>	<u>2016</u>
Trade receivables and accruals	\$ 5,164	\$ 4,486
Loans receivable	<u>-</u>	<u>468</u>
	<u>\$ 5,164</u>	<u>\$ 4,954</u>

Refer to Note 9 for loans receivable.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

7. Property and equipment (continued)

Leased property

Assets of the Authority included in Federal real property and other property and equipment includes property leased to third parties under operating leases with carrying amounts of \$137,731 (2016 - \$137,316) and \$11,684 (2016 - \$12,357) respectively. Leases for land and buildings under non-cancellable operating lease agreements have varying terms, break-clauses and renewal rights.

8. Commitments

Capital projects

During the year, additions to property and equipment totalled \$9,099 (2016 - \$8,150). Included in current year additions is property acquired from third parties in a non-monetary transaction, accordingly this transaction has not been reflected in the statement of cash flows. At December 31, 2017, contractual obligations for capital projects are estimated at \$628 (2016 - \$1,224) for the construction and purchase of property and equipment.

9. Financial instruments and risk management

The Authority is exposed to a number of risks as a result of holding financial instruments. Management considers and evaluates those risks on an ongoing basis to ensure that the risks are appropriately managed. These potential risks include credit risk, liquidity risk and market risk.

Credit risk

Credit risk is the risk that the entities to which the Authority provides services may experience financial difficulty and be unable to fulfill their obligations. The Authority reviews outstanding receivables on an ongoing basis and records a provision for accounts where collection is doubtful, or writes off receivables that are considered uncollectible after all collection efforts are followed. In addition, the Authority establishes a general provision for doubtful accounts based on past experience and when economic conditions may indicate losses have occurred that are not specifically identified. The Authority mitigates credit risk by actively monitoring the aging of accounts receivable and regularly follows up on overdue accounts.

An analysis of the Authority's receivables, including long term receivables, and continuity of the Authority's provision for impairment losses on receivables is as follows:

<u>Loans and receivables</u>	<u>2017</u>	<u>2016</u>
Trade receivables and accruals	\$ 5,491	\$ 4,799
Loans receivable (including interest)	-	8,059
Less: allowance for doubtful receivables	<u>(327)</u>	<u>(311)</u>
	<u>\$ 5,164</u>	<u>\$ 12,547</u>

In 2013, the Authority provided a loan receivable to a third party to provide capital infrastructure financing. During the year, in accordance with the agreement terms, the third party fully repaid the loan and accrued interest.

The credit quality of financial assets that are neither past due nor impaired are assessed with reference to historical information and includes the following considerations; new customers / tenants, existing customers / tenants (e.g. greater than six months) with no history of defaults or those that have some history of defaults but were eventually fully recovered.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

9. Financial instruments and risk management (continued)

Credit risk (continued)

An allowance for doubtful receivables was recorded at year end against trade, other receivables and loans in the amount of \$327 (2016 - \$311), for accounts where there is uncertainty regarding ultimate collection. Allowances on loans are measured as the difference between the carrying value of the loan and the estimated fair value of security pledged against the loan. Receivables written off, net of recoveries, during the year amounted to \$5 (2016 - \$2).

It is the opinion of management that the Authority is not exposed to significant credit risks as substantially all trade receivables, including infrastructure grants, are aged under 60 days. Similarly, long term receivables are secured by assets pledged to the Authority from third parties.

Liquidity risk

Liquidity risk is the risk that the Authority will not be able to meet financial obligations as they become due. The Authority manages the risk through management of its capital structure in conjunction with cash flow forecasting. To facilitate the Authority's capital expenditure program, the Authority has credit facilities, as outlined in Note 10 to the financial statements. The total amount of undiscounted cash repayments, including interest and contractual maturities of significant financial liabilities as at December 31, 2017 includes the following:

	Carrying Value	2018	2019	2020	2021	2022 and Thereafter
Non-derivative financial liabilities:						
Bank indebtedness	\$ 5,720	\$ 5,720	\$ -	\$ -	\$ -	\$ -
Payables and accruals	9,983	9,983	-	-	-	-
Provisions	2,531	2,531	-	-	-	-
Long term debt	<u>15,177</u>	<u>2,869</u>	<u>2,869</u>	<u>10,385</u>		
	<u>\$ 33,411</u>	<u>\$ 21,103</u>	<u>\$ 2,869</u>	<u>\$ 10,385</u>	<u>\$ -</u>	<u>\$ -</u>

Market risk

Market risk is the risk that changes in market price, such as foreign exchange rates and interest rates will affect the Authority's earnings or the value of its financial instruments.

a) Foreign currency exchange risk

Foreign currency exchange rate risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign currency exchange rates. All of the Authority's revenues are in Canadian dollars. Expenses incurred and capital acquisitions in foreign currency are approximately \$1,272 (2016 - \$1,683).

b) Interest rate risk

Interest rate risk is the risk that future cash flows associated with the Authority's debt and interest payments will fluctuate as a result of changes in market interest rates. The Authority is exposed to interest rate fluctuations on its credit facilities as outlined in Note 10 to the financial statements. The Authority manages interest rate risk by monitoring market conditions and the impact of interest rate fluctuations on its debt. The Authority utilizes interest rate swaps designated as cash flow hedges to manage variable interest rates associated with the Authority's long term debt. Hedge accounting treatment resulted in interest expense on the related borrowings being reflected at hedged rates rather than at variable interest rates. All of the Authority's long term debt is hedged with interest rate swaps. Net earnings is sensitive to the impact of an increase (decrease) in interest rates of 0.5% on bank indebtedness of \$39 (2016 - \$58).

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

9. Financial instruments and risk management (continued)

Fair value of financial instruments

The Authority classifies financial assets and financial liabilities according to their characteristics and management's choices and intentions. Classifications of financial assets include:

- a) fair value through profit and loss (measured at fair value with changes in fair value recorded in earnings),
- b) held-to-maturity (measured at amortized cost with gains and losses recognized in earnings in the period the asset becomes derecognized or impaired),
- c) available-for-sale (measurement at fair value with changes in fair value recognized in other comprehensive income for the current period until realized through disposal or impairment), and
- d) loans and receivable (measured at amortized cost with gains and losses recognized in earnings in the period that the asset is no longer recognized or impaired).

Classifications of financial liabilities include:

- a) fair value through profit and loss (as previously noted), and
- b) other liabilities (measured at amortized cost with gains and losses recognized in earnings in the period the liability is no longer recognized).

The fair value of financial instruments is the estimated amount that the Authority would receive to sell financial assets or pay to transfer financial liabilities in an orderly transaction between market participants at the measurement date.

The Authority applies a three-tier hierarchy framework for disclosing fair value of financial instruments, based on whether the inputs into the various valuation techniques are observable or unobservable. Observable techniques reflect market data obtained from independent sources, while unobservable inputs reflect management assumptions. Changes in valuation techniques of financial instruments may result in transfers of assigned levels. The hierarchy of input is as follows:

- Level I - Quoted prices in active markets for identical assets or liabilities;
- Level II - Inputs other than quoted prices included in Level I that are observable, either directly or indirectly; and
- Level III - Inputs that are not based on observable market data.

The carrying values of current assets and current liabilities approximate their fair value due to the relatively short period to maturity of these financial instruments. The carrying value of the long term portion of loans receivable approximates fair value due to the current market rates associated with the instruments. Loans and receivables are carried at amortized cost.

The fair value of variable rate long term debt is assumed to approximate its carrying value. Fair value has been estimated by discounting future cash flows at a rate offered for borrowings of similar maturities and credit quality at year end.

There were no transfers between classes of the fair value hierarchy during the year.

The following table summarizes the classifications of the Authority's financial instruments, as well as their carrying amounts and fair values.

	2017		2016	
	<u>Carrying Value</u>	<u>Fair Value</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Financial assets:				
Loans and receivables				
Cash and cash equivalents	\$ 2,637	\$ 2,637	\$ 14	\$ 14
Loans and receivables	<u>5,164</u>	<u>5,164</u>	<u>12,547</u>	<u>12,547</u>
Total financial assets	<u>\$ 7,801</u>	<u>\$ 7,801</u>	<u>\$ 12,561</u>	<u>\$ 12,561</u>

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

9. Financial instruments and risk management (continued)

Fair value of financial instruments (continued)

	2017		2016	
	<u>Carrying Value</u>	<u>Fair Value</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Financial liabilities:				
Other financial liabilities				
Bank indebtedness	\$ 5,720	\$ 5,720	\$ 18,305	\$ 18,305
Payables and accruals	9,983	9,983	8,641	8,641
Long term debt (gross)	15,207	15,191	17,615	17,572
Derivative liabilities	<u>287</u>	<u>287</u>	<u>630</u>	<u>630</u>
Total financial liabilities	<u>\$ 31,197</u>	<u>\$ 31,181</u>	<u>\$ 45,191</u>	<u>\$ 45,148</u>

All of the Authority's financial assets and liabilities are classified as level I with the exception of derivative financial liabilities associated with interest rate swaps which are considered level II.

	<u>2017</u>	<u>2016</u>
Bank indebtedness is comprised of:		
Credit facility drawn		
Floating rate	\$ -	\$ 8,422
Fixed rate	<u>5,720</u>	<u>9,883</u>
	<u>5,720</u>	<u>18,305</u>
Available credit facility	<u>39,280</u>	<u>26,695</u>
Total authorized credit facility	<u>\$ 45,000</u>	<u>\$ 45,000</u>

There are no covenant requirements by the Authority under the credit facility agreement.

10. Credit facilities

The Authority has an unsecured, revolving term credit facility up to a maximum of \$45,000 with a floating interest rate that fluctuates with changes in the Bank's prime lending rate. As at December 31, 2017, the amount drawn down under the revolving facility was \$5,720 (2016 - \$18,305). As part of the revolving term credit facility agreement, \$15,000 of the maximum credit available was rolled into a non-revolving term credit facility with floating interest rates that fluctuate with changes in the Bank's prime lending rate. To minimize the exposure to interest rate fluctuations related to the non-revolving term loan facility, the Authority entered into an interest rate swap agreement during 2015.

In addition to the above, the Authority also has a non-revolving term loan facility of up to \$25,000 with a floating interest rate that fluctuates with changes in the Bank's prime lending rate. As at December 31, 2017, the amount owing under the non-revolving facility was \$15,177 (2016 - \$17,574) and \$2,475 (2016 - \$2,408) is due within the next twelve months. To minimize the exposure to interest rate fluctuations related to the non-revolving term loan facility the Authority entered into an interest rate swap agreement. The non-revolving loan facility is presented net of unamortized transaction costs of \$30 (2016 - \$41).

Principal repayments due in the next four years and thereafter are as follows:

2018	\$ 2,475
2019	2,544
2020	10,188
Thereafter	nil

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

11. Capital risk management

The Authority's objectives when managing capital are to ensure sufficient liquidity to support its financial obligations and execute the operational and strategic plans to continue to provide benefits for its stakeholders and to remain financially self-sufficient. The Authority continually assesses its capital structure and makes adjustments to it with reference to changes in economic conditions and risk characteristics associated with its underlying assets. According to its Letters Patent, the Authority's aggregate borrowing cannot exceed \$75,000 nor can it borrow money as an agent of Her Majesty. Currently, the Authority largely relies on cash flows from operations to fund its capital investment program. The Authority's capital is comprised of bank indebtedness and equity, net of cash and cash equivalents.

<u>Capital management</u>	<u>2017</u>	<u>2016</u>
Total debt	\$ 20,897	\$ 35,879
Less: cash and cash equivalents	<u>2,637</u>	<u>14</u>
Net debt	<u>18,260</u>	<u>35,865</u>
Equity of Canada	<u>179,855</u>	<u>171,405</u>
Capital under management	<u>\$ 198,115</u>	<u>\$ 207,270</u>

12. Provisions

The carrying amount of provisions related to claims brought against the Authority at year end were \$2,531 (2016 - \$2,963). Changes in the measurement of provisions, resulting from new or changed information, are recorded in earnings during the period and classified as other operating and administrative expenses. Estimates are evaluated periodically and reflect all known information at year end, including uncertainty associated with the timing and amount of the eventual settlement. Provisions related to claims have been measured at the present value of the expected future cash flows using a discount rate of 3.9% (2016 - 3.9%) with exception of amounts presented as current liabilities.

13. Employee benefit obligation

On March 1, 1999, the Authority was established as described in Note 1 to the financial statements. Pursuant to the Canada Marine Act, the Authority was required by March 1, 2000, to establish benefit plans for its employees as of March 1, 1999 comparable to the benefit plans that were in place immediately prior to its becoming a port authority. Prior to March 1, 1999, all employees were included in the Public Service Superannuation Act ("PSSA") Plan. The Authority has complied with this requirement and established defined benefit plans which were available only to employees as at March 1, 1999. A defined contribution Plan has been established for employees hired after March 1, 1999. The Authority has established an unfunded supplementary pension arrangement for designated employees.

The defined benefit plan exposes the Authority to actuarial risks such as interest rate risk, longevity risk and inflation risk.

Interest rate risk

The present value of the defined benefit liability is calculated using a discount rate determined by reference to market yields of high quality corporate bonds. The estimated term of the bonds is consistent with the estimated term of the defined benefit obligation. A decrease in market yield on high quality corporate bonds will increase the Authority's defined benefit liability, although it is expected that this would be offset partially by an increase in the fair value of certain of the plan assets.

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

13. Employee benefit obligation (continued)

Longevity risk

The Authority is required to provide benefits for life for the members of the defined benefit liability. Increase in the life expectancy of the members will increase the defined benefit liability.

Inflation risk

A significant proportion of the defined benefit liability is linked to inflation. An increase in the inflation rate will increase the Authority's liability.

Information about the financial position of the Authority's defined benefit and other plans as at December 31, 2017 is as follows:

	Pension Benefit Plans		Other Benefit Plans		Total	
	2017	2016	2017	2016	2017	2016

Halifax Port Authority

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

13. Employee benefit obligation (continued)

The significant actuarial assumptions adopted in measuring the Authority's accrued benefit obligations are as follows as at December 31:

	Pension Plan Benefits		Other Benefit Plans	
	2017	2016	2017	2016
Discount rate	3.40%	3.90%	3.30%	3.65%
Inflation rate	2.20%	2.20%	2.20%	2.20%
Medical cost trend plan	N/A	N/A	4.50%	4.50%
Rate of compensation increase				
Pension/supplemental plan/other benefit plans	3.50%	3.50%	3.50%	3.50%
Designated plan	2.70%	2.70%	N/A	N/A

The estimated employer contributions expected to be paid into the defined benefit plan and supplemental plan for the next fiscal year are \$1,047.

The measurement date used to determine the Plan assets and the accrued benefit obligation was December 31, 2017. The most recent and the next required actuarial valuation for funding purposes are as follows:

	Most Recent <u>Actuarial Valuation</u>	Next Required <u>Actuarial Valuation</u>
Defined benefit pension plan	December 31, 2016	December 31, 2017
Supplementary pension arrangement	December 31, 2016	December 31, 2017

The significant actuarial assumptions for the determination of the defined benefit obligation, including other benefit plans, are the discount rate, salary growth rate, pension growth rate and health care trend rate. The calculation of the net defined benefit liability is sensitive to those assumptions. The following table summarizes the effects of changes in these actuarial assumptions on the defined benefit and other liability as at December 31, 2017:

	Defined Benefit <u>Pension Plans</u>	Other <u>Benefit Plans</u>
Discount rate		
Increase of 25 bsp	\$ 22,689	\$ 3,208
Decrease of 25 bsp	24,912	3,294
Salary rate		
Increase of 25 bsp	24,007	N/A
Decrease of 25 bsp	23,557	N/A
Pension rate		
Increase of 25 bsp	24,651	N/A
Decrease of 25 bsp	22,926	N/A
Health care trend rate		
Increase of 100 bsp	N/A	3,299
Decrease of 100 bsp	N/A	3,206

Notes to the consolidated financial statements

December 31, 2017 (expressed in CAD \$, 000's)

13. Employee benefit obligation (continued)

The present value of the defined benefit obligation was calculated using the same method as the defined benefit obligation recognized in the statement of financial position. This sensitivity analyses are based on a change in one assumption while not changing all other assumptions. This analysis may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in the assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Defined contribution plan

The net expense for the Authority's defined contribution included in salaries and benefits is \$242 (2016 - \$230).

Other benefit plans

Other benefit plans consist of lump sum payment entitlements for employees upon their retirement, calculated in accordance with the Authority's policies. These plans are unfunded and measured using the projected benefit method and management's best estimate of salary escalation and retirement of employees. Assumptions used in the determination of the accrued benefit obligation are consistent with those used in determining the accrued benefit obligation of the pension benefit plans, with the exception of the discount rate.

The Authority is subject to the Government Employees Compensation Act and, therefore, is not mandatorily covered under the Nova Scotia Workers' Compensation Act. The Authority is considered a self-insured employer, responsible for worker's compensation benefits incurred prior to, and since incorporation. The Authority's unfunded obligation for workers' compensation benefits is based on known awarded disability and survivor pensions and other potential service awards for accidents that occurred up to the measurement date. Benefits are provided according to the Nova Scotia workers' compensation legislation.

14. Supplemental cash flow information	<u>2017</u>	<u>2016</u>
Change in non-cash operating working capital		
Trade receivables	\$ (678)	\$ 869
Prepaid expenses	(65)	(220)
Payables and accruals	1,342	1,525
Deferred revenue	<u>(214)</u>	<u>282</u>
	<u>\$ 385</u>	<u>\$ 2,456</u>
Bank indebtedness, net of cash and cash equivalents		
Cash and cash equivalents	\$ 2,637	\$ 14
Bank indebtedness	<u>(5,720)</u>	<u>(18,305)</u>
	<u>\$ (3,083)</u>	<u>\$ (18,291)</u>
Interest paid	<u>\$ 698</u>	<u>\$ 856</u>
Interest received	<u>\$ 398</u>	<u>\$ 377</u>

15. Related party and other information

Key management includes directors and persons who have the authority and responsibility for planning, directing and controlling the activities of the Authority, directly or indirectly, during the fiscal year. In addition, the Canada Marine Act requires disclosure of remuneration and allowances paid to directors and certain employees. A summary of compensation as at December 31 was as follows:

Name	Title	Remuneration ⁽¹⁾	Directors			2017	2016
			Fees	Allowance			
Hector Jacques (2)	Chair	\$ 35	\$ 37	\$ -	\$ 72	\$ 42	
Thomas Hayes (3)	Vice Chair	18	18	-	36	29	
Jim Spatz	Director	9	13	-	22	12	
Anne Soucie (4) (5)	Director	7	15	-	22	-	
Diana Dalton (6)	Director	5	15	-	20	-	
David Cameron (4) (7)	Director	8	11	-	19	-	
Carole-Ann Miller (4) (8)	Director	7	12	-	19	-	
Lantz Siteman (9)	Former Director	7	5	-	12	35	
Edward Larsen (9)	Former Director	5	6	-	11	27	
Karen Oldfield	President, Chief Executive Officer	423	-	11	434	422	
Paul MacIsaac	Senior Vice-President	247	-	7	254	250	
Krista Dempsey	Vice-President, Real Estate	179	-	7	186	185	
Catherine McGrail (10)	Vice-President, Operations (Interim)	145	-	-	145	125	

In addition, other short-term and post-employment benefits provided during the year was \$120 (2016 - \$140).

- (1) Remuneration includes salary and management bonuses
- (2) Chair – Governance Committee
- (3) Chair – Infrastructure & Gateway Strategy Committee
- (4) Appointed Director May 11, 2017
- (5) Chair – Human Resources & Compensation Committee
- (6) Appointed Director June 5, 2017
- (7) Chair – Audit Committee
- (8) Chair – Security, Environment & Safety Committee
- (9) Term as Director expired May 11, 2017
- (10) Appointed May 2, 2016

16. Contingent liabilities

There are various claims and litigation, which the Authority is involved with, arising out of the ordinary course of business operations. The Authority's management does not consider the exposure to such litigation to be material, although this cannot be predicted with certainty.
